

Emergency Response Planning for Corporate and Municipal Managers

Emergencies wreak havoc on businesses and governments on a daily basis. Whether it is a hurricane pounding a coastal community, a terrorist attack on a company's headquarters, or a hazardous chemical spill at a local school, the results can be loss of life, health, and property. How can you prevent or reduce the effects of such occurrences? By planning ahead. Emergency Response Planning is designed to help corporate and municipal managers quickly understand their roles in proactive and reactive emergency management. Author Paul Erickson shows how to develop partnerships with federal, state, and local government agencies, as well as community groups in order to prevent, prepare for, and respond to natural disasters and manmade emergencies. Emergency Response Planning provides essential information to help you comply with government regulations, design an emergency response plan, train personnel, use the proper safety equipment, safeguard information systems, and resume normal operations after an emergency as quickly as possible. It will also help consultants design emergency response plans for their clients, and provide practical information for students studying business continuity and emergency issues.
