

Basic Assessment And Treatment Of Trauma

Basic Assessment and Treatment of Trauma (ATT) represents the state-of-the-art in prehospital trauma assessment and management. Based on the most current medical information and best practices, this concise and highly interactive continuing education course covers the critical knowledge and skills necessary to rapidly evaluate, stabilize, and transport the trauma patient. A key feature of this course is its coverage of current controversies in trauma treatment and management, including controversies brought on by changing technology or very recent changes in treatment modalities. A free audio CD-ROM is included with each copy of the text as well.
